

powerbi_v0 User's Guide

by LAHT

On the left side there is a navigation bar. Click on the buttons to view the following pages:

- Project overview
- Project progress
- Project flow
- Raw data

Project summary:

- On this page you will find information about the work, committed efforts and contingency.
- The **Job Summary** section is interactive. For example, **click** on the **04.IPL** bar under **Jobs by Partner** and the **Job Summary** results will show a summary of the **04.IPL** jobs.
- To undo the previous selection, **click** on the same bar again.

Page 1. Project Overview

On this page there are four main sections. From top to bottom, we have:

Filters:

- They are global filters. Then, we can filter all the information displayed on the page. For example: **click** on the **APP** drop-down list and select **APP1**. Then, the whole page will only show information about **APP1**, even in the rest of the filters.
- For multiple selection, **hold** down the **Ctrl** key and **click** on your choices.

Information panel:

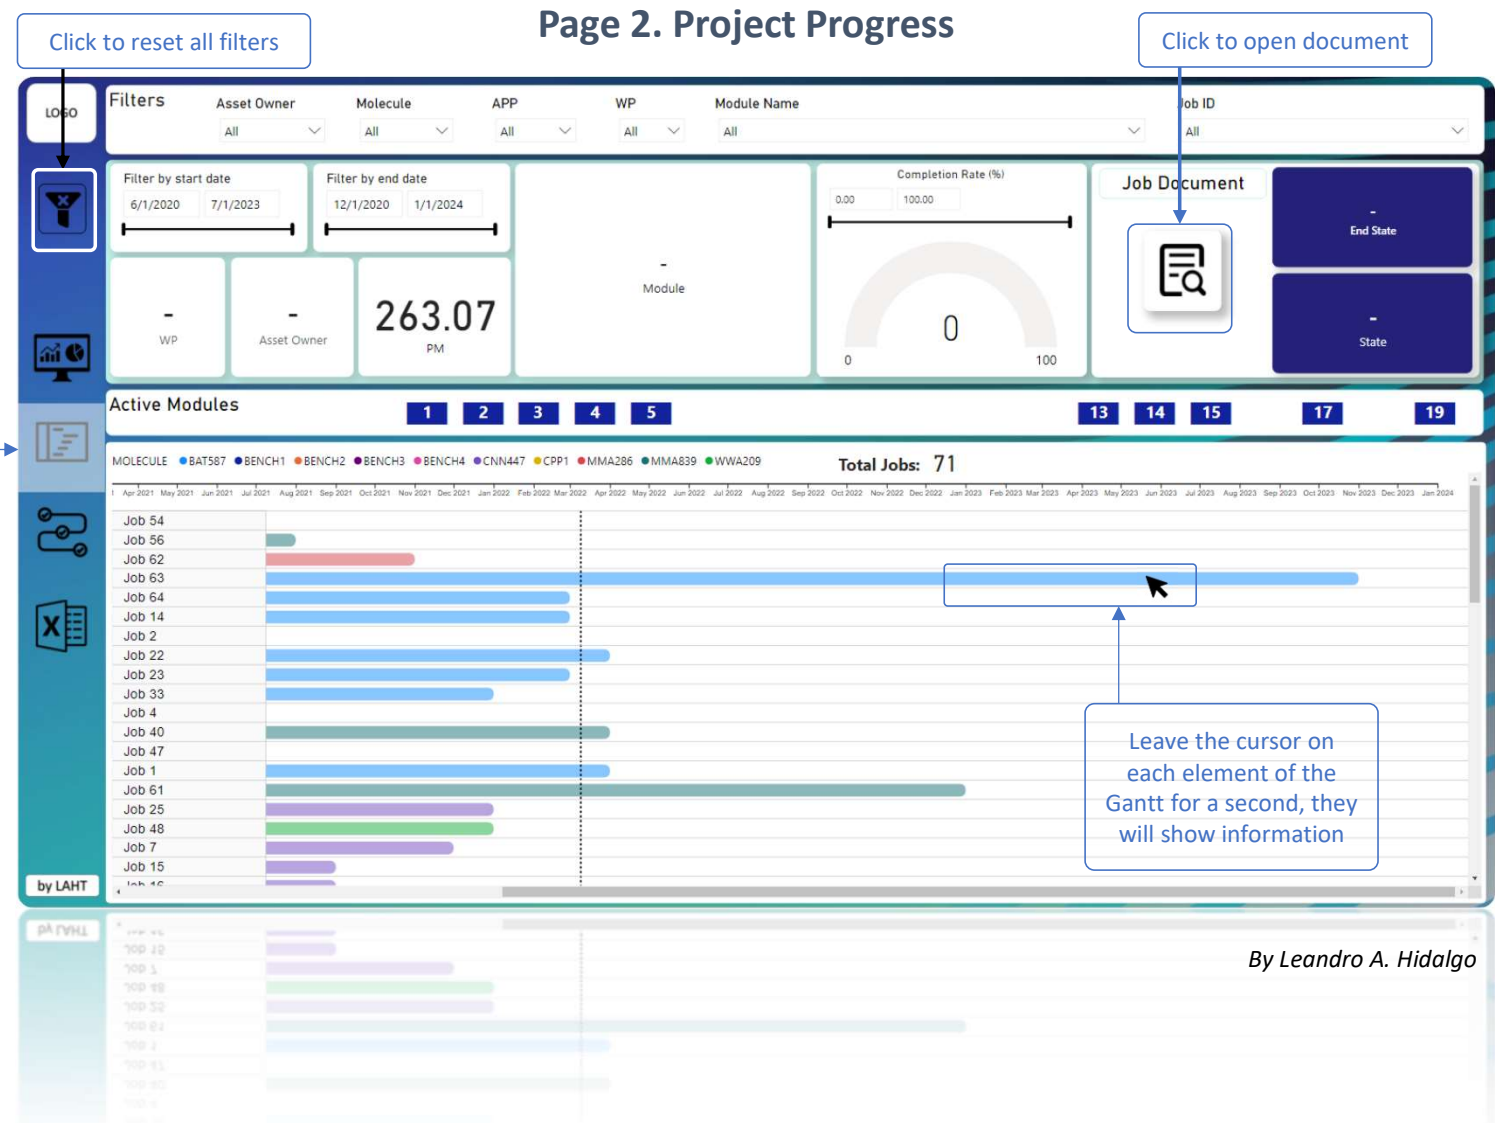

- In this section we have three slicers: Filter by Start Date, Filter by End Date and Completion Rate. These are also global filters.
- There is a button that opens the document of a selected job. If the button does not respond it is because a job has not been selected or because there is not yet a document for that job.

Active Modules:

- Indicate the active module(s).

Gantt

- Chart with all the Jobs.

By Leandro A. Hidalgo

On this page we also have the Filters section. It is connected to the previous and next pages. This means that if we filter here, we are also filtering the **Project Progress** and **Raw Data** pages and vice versa.

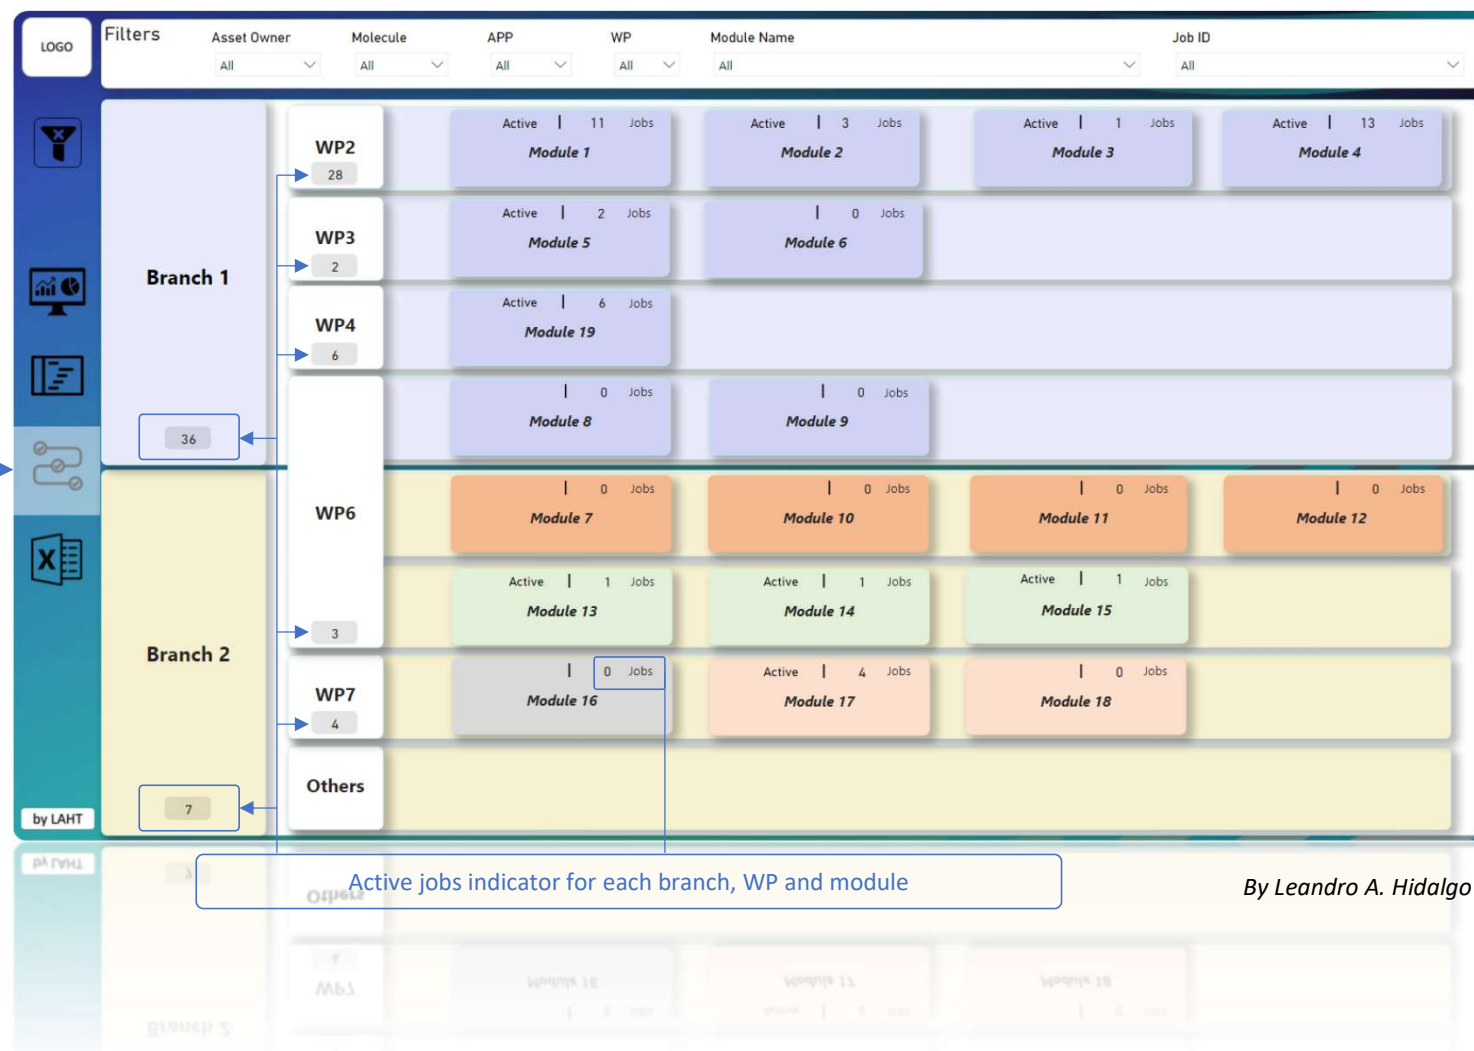

Filters:

- They are global filters. Then, we can filter all the information displayed on the page. For example: **click** on the **APP** drop-down list and select **APP1**. Then, the whole page will only show information about **APP1**, even in the rest of the filters.
- For multiple selection, **hold** down the **Ctrl** key and **click** on your choices.

Project flow panel:

- There are indicators of the number of active jobs in each module, work package and branch.
- The number in these indicators change depending on the queries you perform with the filters.

Page 4. Raw Data

On this page we also have the **Filters** section. It is connected to the previous pages. This means that if we filter here, we are also filtering the **Project Progress** and **Project Flow** pages and vice versa.

Filters:

- They are global filters. Then, we can filter all the information displayed on the page. For example: **click** on the **APP** drop-down list and select **APP1**. Then, the whole page will only show information about **APP1**, even in the rest of the filters.
- For multiple selection, **hold** down the **Ctrl** key and **click** on your choices.

Raw data panel:

- This section is for those who prefer to analyze the results of the queries in tabular form.
